PROFESSIONAL SUMMARY

Skilled in project management and passionate about creating user-friendly, efficient, and innovative solutions. Committed to continuously learning and expanding my technical and professional skills. Actively seeking new challenges and opportunities to further develop my skills and make a positive impact in the field. Adept at working effectively in a fast-paced environment, collaborating with team members, and delivering high-quality results under tight deadlines.

SKILLS

- JAVA
- PYTHON
- PHP
- JAVASCRIPT
- ReactJS
- React Native
- HTML/CSS , C/C++
- SQL/MySQL
- Web API
- Android
- Cloud

EDUCATION

MCA
MIT WPU • PUNE,
MAHARASHTRA
2021-2023

BSC(CS)
MMCC • PUNE,
MAHARASHTRA
2018-2021

INTERNSHIP

- GREDIENTEK IT SOLUTIONS , PUNE
- June 2022 - August 2022
- Web Development Intern
- Designed user interface for a web application using modern design principles and techniques.
- Developed and implemented a secure backend using PHP and MySQL database, ensuring optimal database performance and scalability.
- Improved technical skills in web development, including UI design and backend development using PHP and MySQL.

PROJECTS

- Project: Hospital Management System
- Technology: Java, Java AWT, Java Swing, JDBC, and MySQL
- Development Environment: NetBeans IDE
- Description: Developed a comprehensive Hospital Management System using Java and MySQL database. Utilized both Java AWT and Java Swing for building the graphical user interface and JDBC for connecting the application to the backend database. The system included modules for managing patient records, appointments, billing, and more. Implemented security measures to ensure the confidentiality and integrity of sensitive patient data. Developed the project using the NetBeans IDE.
- Project: Student Accommodation Finder
- Technology: HTML, CSS, Bootstrap (Front-end), PHP (Back-end), and MySQL (Database)
- Description: Built a rental website using HTML, CSS, and Bootstrap for the front-end and PHP for connecting to the database and performing operations. Utilized PHP to connect to a MySQL database, allowing for the storage and retrieval of rental property information. Developed a user-friendly interface and user experience using HTML, CSS, and Bootstrap.
- Project: Crypto Currency Monitor
- Technology: React.js, Bootstrap, JSX, and Crypto API
- Description: Built a web application that displays the top 50 or 150 crypto currencies from a Crypto API. Utilized React.js for the front-end development and Bootstrap for styling and layout. Implemented JSX to create a dynamic user interface and interact with the Crypto API to retrieve real-time data. The application was designed to provide a comprehensive and user-friendly experience for users interested in monitoring the latest crypto currency information.
